RSL Seacam Zoom Cameras

The RSL Seacam Zoom Camera is available in both Stainless Steel and Acetyl bodies. It has a minimum depth rating of 10 metres (Nuclear use) but can be adapted for use in the offshore sectors with a 1000m plus dependant on the particular application.

The camera comes equipped with a 36:1 zoom lens and is ideal for those situations when remote access is only partially available.

The Zoom Camera is able to withstand harsh nuclear environments (11.4Ph) and is used widely throughout the Sellafield Nuclear complex.

Both acetyl and stainless options have a proven track record, it has a long life span and requires virtually no maintenance.

The camera can be provided in a range of body sizes, please contact RSL if you require an alternative.

Specifications:
- Diameter: 85mm
- Length: 169mm excl connector

Image Sensor: 1/3" IT CCD
Effective Pixels: 768 x 494 (NTSC), 752 x 582 (PAL)
Resolution: 550+ TV lines (PAL)
Video Out: Composite S video
Lens: x36:1 optical zoom
Wide Macro Auto Focus
Min Illumination: 0.1 lux face plate
S/N Ratio: more than 48DB
Electronic Shutter: 27 steps 1/60 (1/50 PAL) - 1/10000 sec
